Willette et al. in review, listed in the September 2013 version of Table B now refers to:

Willette DA, Chaifour J, Debrot AO, Engel S, Miller J, Oxenford HA, Short FT, Steiner SCC, and Vedio F (2014) Continued expansion of the trans-Atlantic invasive marine angiosperm *Halophila stipulacea* in the Eastern Caribbean. *Aquatic Botany*, 112: 98-102

Information on *H. stipulacea* from Simpsons Bay in St. Martin (cited as Debrot et al. in review in Table B) is also confirmed in Willette et al. (2014)

January 2014 UPDATE

Table A. Comparison of conspicuous algae, invertebrates and vertebrates observed along the west coast transect surveys in 2008 and 2013. Occurrence of organisms is described as the number of transects along which they were observed and in what abundance; rare 1-3 individuals per transect (R), occasional 4-9 (O), or common >10 (C). The total number of sightings per group is given under T.

	Species	2008				2013			
		R	O	C	T	R	O	C	T
Chlorophyta									
1	<i>Ventricaria ventricosa</i>	2	-	-		-	-	-	
2	<i>Caulerpa seriatularoides</i>	4	1	-		-	2	-	
3	<i>Avrainvillea (asarifolia)</i>	4	3	-		-	-	-	
4	<i>Halimeda (gracilis)</i>	4	4	1	39	2	1	2	12
5	<i>Penicillus capitatus</i>	2	4	5		2	1	2	
6	<i>Udotea cyathiformis</i>	2	-	-		-	-	-	
7	Unidentified filamentous alga	1	1	1		-	-	-	
Phaeophyta									
8	<i>Dictyota pulchella</i>	2	1	1			3	-	
9	<i>Dictyota</i> sp.1	1	1	-			-	-	
10	<i>Dictyota</i> sp. 2	-	-	1	9		-	-	4
11	<i>Dictyota</i> sp. 3 epiphytic	-	-	-			1	-

76	unidentified juv. Labridae	-	-	-		-	1	-	
Chondreychteis									
77	<i>Narcine brasiliensis</i>	1	-	-	1	-	-	-	1
78	<i>Dasyatis americana</i>	-	-	-		1	-	-	
Reptilia									
79	<i>Eretmochelys imbricata</i>	1	-	-	1	-	-	-	0

Table 4. Morphology of areas from which *Halophila stipulacea* has been reported in the Caribbean 2002-2013. Where extensive stretches of coastlines were surveyed and five or more locations with *H. stipulacea* were documented per observation team, the northernmost and southernmost coordinates are given.

Island Location	Coordinates	Coastal Morphology	Orientation	Observation time frame	Sources for <i>H. stipulacea</i> presence
Bonaire					
Lac Bay	12°06'10"N 68°13'59"W	lagoon behind fringing reefs	windward SE	2011, 9-11	Debrot et al. 2012
Curaçao					
St. Joris Baai	12°07'16"N 68°48'59"W	lagoon with narrow sea access	windward NE	2012	Willette et al. 2014
